## Academic Projects

Title : MARX Generator Using Power Mosfet  
Platform : Electrical Component Duration : 6 Months  
Description : Marx generator generates high voltage from the low voltage supply. It is based on the principle of Marx principle. It generates high voltage pulse by charging the number of capacitor in parallel and discharging them in series. The spark gap used as switches have a breakdown voltage greater than supply voltage, so they behave as open circuit while the capacitors charge. Spark gap can be replaced by the application of electronic switching devices. The output voltage can vary, by varying the number of capacitors.

## Other Information

Extra Curricular : Successfully Organised and Participated in Brain Storming Event, Participated in 4th Bharatiya Chhatra Sansad.

## Personal Information

Date of Birth : 16/10/1995 Gender : Male
